

Print Cloud Mobile Printing

Print Cloud allows you to print anywhere using your PC or mobile device by obtaining a document release code. This pull printing approach lets you retrieve your documents from any Print Cloud enabled Ricoh device, without installing printer drivers or having to specify the printer from which you want to print.

Who Should Use Print Cloud

- Mobile users looking for pull printing

Benefits

- Print Cloud solves the problem of not having access to a printer when you're mobile
- You don't need to connect to a network in order to print
- Multiple ways to submit a print job, including your laptop, Smartphone or mobile device to print to any Print Cloud enabled Ricoh printer or MFP
- Supports printing of the email body along with attachments and URLs contained in the email
- Pull printing lets you print your documents at any Print Cloud enabled Ricoh device without specifying the device in advance
- Control output settings at the device including: number of copies, duplex, layout or stapling

Using Print Cloud

- To use the service, you can email your print job directly to the Ricoh Print Cloud at print@ricohprintcloud.com
- Your files are held in the cloud until you are ready to pick them up
- The software can process and print attachments such as Microsoft Word, Excel, or PowerPoint files; PDFs, photos, webpages, even the email body text
- Once the email is received by the Ricoh Print Cloud service, a release code is generated and emailed back to you
- Simply enter your release code at the device to retrieve your prints

Implementing this Solution

- Cloud Scanning is complemented by the Ricoh Print Cloud.
- Print Cloud is a service so there's no software to buy or install
