RICOH ICE Education Package

RICOH
imagine. change.

Encourage learning with digital processes

The RICOH Integrated Cloud Environment (ICE) Education Package simplifies processes for students and teachers. Across campuses, instructors and students are continually sharing information. Often, they use hardcopy formats — such as a handwritten brainstorming session, work for an algebra equation or a page from a reference book. Tedious workarounds make it difficult for instructors and students to include hardcopy information in their digital learning processes. The Education Package is designed to meet the unique needs of today's digital-centric learning environments.

Benefit from information on paper

With the Education Package, instructors and students no longer have to choose between the hardcopy information they need and the digital convenience they want. Instead of re-typing documents one at a time, you can easily transform printed and handwritten pages into more usable digital information. Ricoh ICE converts scanned documents into multiple digital file formats — including Word®, Excel® and PDFs. Optical Character Recognition (OCR) capabilities are built in, transforming hardcopy pages into practical documents that can be searched, edited and shared with those who need them.

Eliminate workarounds

Traditional processes for uploading hardcopy material into cloud applications — such as Dropbox™ and Google Drive™ or learning management systems like Canvas® — can be cumbersome and inefficient. With the Education Package, what was once a multi-step process of scanning, saving, emailing and uploading is replaced with one simple step. Just choose a location, file format and desired settings, and your documents will appear as digital files in your chosen cloud app account. When you can scan directly into the services your classroom uses daily, important information becomes instantly accessible and ready to use or share.

Simplify mobile printing

The majority of students on today's campuses rely on smartphones. The Education Package makes campus mobile printing simple, enabling instructors and students to submit print jobs from their smartphones or tablets to any ICE-enabled Ricoh device. There's no need to track down special print drivers. Just send an email to print@iceprintcloud.com with your files attached. Receive a security release code, visit any ICE-enabled Ricoh device and use the code to release your document for printing.

Gain new productivity from Ricoh MFPs

Students, teachers and administrators can quickly enjoy newfound productivity from Ricoh MFPs and printers on campus. Ricoh handles the technology behind the scenes and maintains the service, so users have the freedom to easily share information without burdensome processes. Enhance your campus experience with the Ricoh Integrated Cloud Environment Education Package.

With the ICE Education Package you can:

- Convert hardcopy documents to editable digital formats
- Scan directly into Canvas, Google Drive, Dropbox and more
- Print your documents from tablets and smartphones
